SEPTA® Mouth Spray

Chlorhexidine digluconate 0.12%

SEPTA® Mouth Wash

Chlorhexidine digluconate 0.12%
With Menthol and Eucalyptus

ANTISEPTIC Protecting against Virus & Bacteria

- Prevention of Plaque
- Prevention and treatment of gingivitis
- Promotes gingival healing after periodontal surgery
- Management of aphthous ulceration and oral candidal infections

Dose:

Spray 3 or 4 times into the mouth, 2 or 3 times a day

Mouthwash Rinse with 10 mL for 1 minute, 2 or 3 times a day

SEPTA mouth spray is especially effective to target specific areas of the mouth or for who prefer not to use mouthwash.

A study published by Korea University College of Medicine, Seoul, Korea on 25th may 2020 in the journal of Korean Medical Science has concluded:

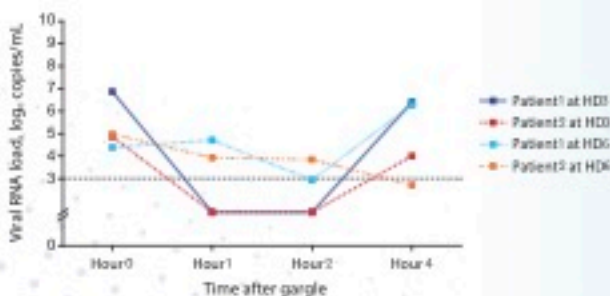

Fig. Impact of chlorhexidine mouthwash on the severe acute respiratory syndrome coronavirus 2 viral load in the saliva. HD = hospital day.

SEPTA® mouthwash was effective in reducing the SARS-CoV-2 viral load in the saliva

SEPTA®

- Beneficial for control of SARS-CoV-2 in both the community and hospital setting
- Reduce the risk of covid-19 transmission in addition to mask wearing & hand washing
